

EAHIL Council Election - Candidate Statement	
<i>Country</i>	Denmark
<i>Name</i>	Louise Stenholt
<i>Affiliation</i>	Medical Library, Regional Hospital Central Jutland, Viborg
<i>My professional education and experience</i>	I am an experienced medical librarian currently working at the Regional Hospital Central Jutland in Viborg, Denmark. In my work I support hospital staff and researchers with literature searching. I have experience working as an embedded librarian and conducting systematic reviews. My research interests include the reporting and standards of information retrieval, as part of the systematic review process. Currently I am following the pitfalls and possibilities of AI tools closely. I also have great interest in library didactics and have completed the Master of ICT and Learning (MIL) at Aalborg University in Aalborg, Denmark. Prior to my current role I worked at the Medical Library at Aalborg University Hospital, and has also worked in University College Libraries and a public library.
<i>What I think is special about EAHIL</i>	EAHIL provides an extended professional network and facilitates the exchange of ideas, troubleshooting and professional development. This is particularly important coming from a small country.
<i>What I expect to contribute to EAHIL Council</i>	I will strive to improve professional collaboration amongst librarians in the health care sector and to be an active link between the health care libraries community in Denmark and the EAHIL Council.
<i>What I think are the most important issues for European health information professionals in 2025-2028</i>	In the wake of the Covid-19 pandemic we all need to work together, learn from one another and share our professional experiences.
<i>My one-line statement for my election campaign</i>	“Sharing is caring!”
