

<b>EAHIL Council Election - Candidate Statement</b>	
<i>Country</i>	Switzerland
<i>Name</i>	Floriane Muller
<i>Affiliation</i>	University of Geneva, Medical library (Site CMU) Rue Michel Servet 1, 1211 Genève 4
<i>My professional education and experience</i>	<p><b>Education</b> BSc in Humanities (with History of Medicine options), University of Geneva MSc in Information Science, Haute Ecole de Gestion / University of Applied Sciences Western Switzerland, Genève</p> <p><b>Experience</b> I work as a research support librarian at the medical branch of the University of Geneva Library. I'm in charge of Publishing support, Open Access, the Institutional Repository, as well as Research Data Management support. I collaborate with other colleagues to develop and offer training sessions on those topics. I joined the library in 2012 and took my current position in 2017 after working initially in the collection service and as document delivery service coordinator.</p>
<i>What I think is special about EAHIL</i>	<p>For me EAHIL is like a big family, whose members I look forward to seeing each year at the conference. I've been attending every year since Dublin, in 2017.</p> <p>EAHIL is a very welcoming community where people are sharing experiences, useful tips and developing long-lasting friendships. When I come back from the conference each year, I am buzzing with thousands of new ideas. It's inspiring and motivates me to try new things, explore new avenues in our own library.</p>
<i>What I expect to contribute to EAHIL Council</i>	As a member representing Switzerland I hope to contribute to making the association better known in Swiss libraries, and sharing experiences not only during the annual conference. After all what EAHIL has given me, I'd be happy to contribute to EAHIL where I can be of use.
<i>What I think are the most important issues for European health information professionals in 2025-2028</i>	<ul style="list-style-type: none"> <li>• AI tools: impact on our work, usefulness for users, but also ethical implications</li> <li>• Preservation of digital born contents and data</li> <li>• Equitable access to (and sharing of) validated scientific information in its many form</li> <li>• Providing our services (eg. Training sessions) at the right time, in the right format, while still maintaining human connections in a highly digital environment.</li> </ul>
<i>My one-line statement for my election campaign</i>	Sharing is caring: Together we can go further, and everyone has something to contribute.
